Dear Mr. Cunha,

This letter is to confirm the partnership between Brasil Tecnologia Ambiental (CNPJ 03.295.269/0001-30) and DGMR Software B.V. regarding the customization of software for the Brazilian market sectors of oil and gas, energy and health and safety.

DGMR has developed general purpose software, called NoiseAtWork, to visualize occupational Noise and to calculate the Noise dose based on Noise measurements.

3RBrazil has been investigating the specific needs and legislation of the Brazilian market regarding the calculation and visualization of occupational Noise. In specific the calculation method of the Noise Dose has been developed and tested by 3RBrazil. Based on the findings of 3RBrazil the NoiseAtWork software has been adapted. Subsequently 3RBrazil has translated the user interface and the help file into the Portuguese language. Currently 3RBrazil is also promoting and selling the NoiseAtWork software in Brazil as an official reseller for DGMR.

With kind regards,  
DGMR Software B.V.
